

TRAVEL DESTINATION WEBSITE

INTRODUCTION:

- Everyone of us is always looking for new travel destination to visit to get a break from our daily routine and refresh ourselves. Most of such web searches directs us to places abroad or some popular places in India, but from those searches we don't get to know about the places which shows India's rich culture and heritage which are dispersed in remote places of our country.
- Our website will be a ordered collection of all such dispersed places which would serve as a perfect guide and solution for travel enthusiast and tourist.
- The statewise categorization of destinations would enable user to look for a peculiar destination spot to visit in their state. Even State Tourism Department could use this information to promote tourism in their respective state.

PROBLEM DEFINITION:

- Most people in India look for travel destinations abroad without being visited the whole of our country this lowers our economy and discourages tourism in our country.
- The reason why people travel abroad for a vacation is mostly because they are not aware of the rich cultural heritage and monuments that our country holds. Even there are places which are bestowed with such natural beauty, that even just visiting that places refreshes your soul.

Scope:

- After this pandemic ends, tourism industry is surely on a verge to get revolutionized and it would be a great opportunity for us to promote tourism in India, as people may be hesitant for international travel.
- Even we could approach various tours and travels organizers to use the information of our websites.

TECHNOLOGIES USED:

- HTML
- PHP
- CSS
- JavaScript

SOCIAL IMPACT:

- Our website would make people aware about the places in India which they surely want to have included in their bucket list.

- After getting to know the rich culture and heritage of our country a sense of pride for India would get inculcated among the citizens which would promote Nationalism.
- As tourism in India gets promoted the country's economy will be benefited.
- The remote places which would get promoted it could create various job opportunities for the rural population nearby.
